(54) TEACHING MATERIAL DISTRIBUTION SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a teaching material distribution system capable of not only remarkably improving teaching materials in quality and volume and also at low costs, but also raising the level of school lessons in the educational facilities, and further, improving the educational environment of the whole country.

SOLUTION: A teaching material distribution system capable of distributing teaching material data files, which consist of data files containing document data or multi-media data and are used as teaching materials for learning subjects, to information processing terminal stations of users of the teaching materials through the Internet, comprises a new teaching material registration system by which learning items composed by hierarchically itemizing the learning subjects are presented and many persons are asked to prepare new teaching material data files, and then they newly register these teaching materials, and an evaluation system by which many users evaluate these teaching material data files.
